About

ShibaCash Decentralized token

ShibaCash is, in short, a rug-proof, ownership renounced, community driven project that will bring rivalry to Shiba with positive vibes only.

Bitcoin Cash reached an ATH of 0.25 Bitcoin. Our first goal is for Shiba Cash to reach 25% of Shiba peak market capitalization.

We are fully committed and determined to make this happen.

Tokenomics

SYMBOL: \$ShibC

TOTAL SUPPLY: 1.000.000.000.000.000 TOKENS

TOTAL BURNED: 50% to BLACKHOLE

Blackhole address:

ShibaCash employs 3 simple functions:

8% Total transaction fee.

4% of each transaction goes to liquidity pool.

4% of each transaction is redistributed to holders including the burn address...

SHIBACASH Charity

From ShibaCash we want to help all the animals in the world who are in need.

Every month we promise to donate 2% (of the value of the LP) to animal shelters.

As a community token we'll decide together to which organization to donate it.

Disclaimer

General information on this website is in no way meant as financial advice.

The individual voluntary contributors to this project are not responsible, and cannot be held accountable, for any present or future risk involved with your personal investment into ShibaCash or in other projects that are mentioned on this website.

DeFi products, on the Binance smart chain or other chains, are considered a "high risk - high reward" investment and thus follow the golden rule:

Never invest more than you can afford to lose and do your own research (DYOR).

SHIBACASH About Whales

Having whales is perfectly normal for a young token such as Shiba Cash.

They helped us in the very early stage to get some traction!

The good news is that no whale holds more than 2.5% and top holders made it known they are in it for the long run and will not sell all their tokens at once.
